Solid wood school desk

Research & ArticlesAll CategoriesFor VendorsAbout UsExplore Help Desk Software for SchoolsOverviewProductsGuideChat Skip to content Home > Tables & Chairs > Vintage Solid Wood Convent School Desk - H83cm x W81.5cm x D 53.5cm This is a vintage solid wood school desk that would have come out of an old Irish convent school. It is a charming, vintage school desk, engraved with the student scribbles from those long school days. This lovely single wooden desk has a great colour and a storage underneath for books. Unlike some, the top of the desk does not lift up. This lovely piece would make a fantastic addition to any child's bedroom. Dimensions: Back H 83cm (32.75 inches) Front H 77cm (30.25 inches) W 81.5cm (32 inches) D 53.5cm (21 inches) Delivery is available.

Find something memorable, join a community doing good. Skip navigation! When selecting flooring or furniture, you may have noticed a significant price difference between brands, types of wood and manufactured wood. It isn't uncommon for consumers to pick manufactured wood for its cost-effectiveness. Here's a look at the definition of manufactured wood and its popularity.Definition of Manufactured WoodYou'll often see manufactured wood also referred to as composite boards or engineered wood. During the manufacturing process, fibers, particles of wood and veneers are bonded together in factories and manufacturing processes. Types of manufactured wood include plywood or laminated board, fiberboard, medium density fiberboard (MDF), particleboard or chipboard, and blockboard. Depending on the type of manufactured wood, the process for making it will vary. For example, particleboard presses together very small pieces of wood using heat and resin. Plywood is pieces of hardwood — called veneers — that are bonded together at right angles with resin glue.Why Choose Manufactured Wood?Manufactured wood has grown in popularity for many reasons. The first is that the materials, like the particles used in chip or fiber boards, for example, would previously be disposed of as waste. Manufactured wood is also more cost-effective than solid wood. Consumers like that manufactured wood products look similar to solid wood but have a lower price tag.When Was Manufactured Wood First Introduced?During World War II, rationing of consumables was occurring everywhere, which led to the inception of utility furniture manufacturing. The shortage of raw materials led to lean manufacturing principles and the expansion of what was soon referred to as this "knock-down" furniture, which was ready to assemble. These furnishings were affordable and made from four different types of manufactured wood including blockboards, fiber boards, particle boards and plywood.Which Is More Durable?It isn't uncommon for consumers to wonder which is more durable — manufactured or solid wood. The answer depends on the application. For example, if you're working with a manufactured wood floor, you may find it isn't as durable as a solid wood floor. The main reason is that it can lose its laminate luster and experience chipping. A solid wood floor, in comparison, can be refinished.Why Use Manufactured Wood?There is a myriad of benefits to using manufactured wood. One of the most significant includes that it can be easily modified into flooring and furniture cost-effectively. Using this kind of wood also features durability when you're looking for furniture pieces that will last for years. You'll also be using materials that have been recycled and can be recycled again, which is appealing to environmentalists. It's also easy to maintain furniture and flooring that's made from manufactured wood. D 16 in.Magnificent Victorian Double School Desk Elm and Metal Painted, circa 1870Located in London, with its colorful history of penned correspondence that grew in popularity alongside literacy. The demand for suitable writing desks, which would serve the composer of the letters as well as ensure the comfort of the recipient naturally followed, and the design of these necessary furnishings has evolved throughout history. Once people began to seek freedom from the outwardly ornate styles of the walnut and rosewood writing desks and drafting tables introduced in the name of Queen Victoria and King Louis XV, radical shifts occurred, such as those that materialized during the Art Nouveau period, when designers longed to produce furniture inspired by the natural world's beauty. A prime example is the work of the famous late-19th-century Spanish architect Antoni Gaudí — his rolltop desk featured deep side drawers and was adorned with carved motifs that paid tribute to nature. Gaudí regularly combined structural precision with decorative elements, creating beautiful pieces of wood and metal.Soon afterward, preferences for sleek, geometric, stylized forms in furniture that saw an emphasis on natural wood grains and traditional craftsmanship took hold. Today, Art Deco desks are still favored by designers who seek to infuse interiors with an air of luxury. One of the most prominent figures of the Art Deco movement was French decorator and furniture designer Émile-Jacques Ruhlmann. With his use of neoclassical motifs as well as expensive and exotic materials such as imported dark woods and inlays of precious metals for his vintage writing desks, Ruhlmann came to symbolize good taste and modernity.The rise in appreciation for Scandinavian modernism continues to influence the design of contemporary writing desks. It employs the "no fuss" or "less is more" approach to creating a tasteful, sophisticated space. Sweden's master cabinetmaker Bruno Mathsson created gallery-worthy designs that are as functional as they are beautiful. Finnish architect Alvar Aalto never viewed himself as an artist, but, like Mathsson, his furniture designs reflected a fondness for organic materials and a humanistic approach. Danish designers such as Hans Wegner introduced elegant shapes and lines to mid-century desks and writing tables, often working in oak and solid teak.From vintage desks to contemporary styles, 1stDibs offers a broad spectrum of choices for conducting all personal and business writing and reading activities.
